Ysgol Busnes Caerdydd

2nd INNOVATION Lean Effective Green Operations (iLEGO) WORKSHOP

Theme: Putting Innovation at the Heart of Environmentally Sustainable Supply Chains
Save the Date: 30th March 2017, Cardiff University

After the success of the first iLEGO workshop in January 2016, Cardiff Business School presents another opportunity for practitioners and academics to get together to share ideas on how to put innovation at the heart of creating sustainable supply chains.

Cardiff have teamed up with Panalpina, the first global supply chain company to commit to set scientific based targets as part of their global effort to reduce environmental impacts.

Join us in Cardiff to discuss:

- The Impact of Industry 4.0 on future of supply chain business models and practices
- The role played by disruptive technologies such as 3DP and UAV's to radically improve environmentally efficient supply chains
- Best practice ideas on applying operational excellence concepts (such as Lean, Six Sigma, Agile) in a supply network
- Best practice ideas on reducing the environmental impact of your supply chain
- How knowledge sharing can promote innovation in a supply network
- Hear from leading organisations and academics on how to create an innovative culture at supply network level to put lean and green at the heart of your business improvement plans

Organized by:

Dr Maneesh Kumar – Reader in Service Operations, Cardiff University, kumarm8@cardiff.ac.uk

Dr Vasco Sanchez Rodrigues – Lecturer in Logistics and Operations Management, Cardiff University, SanchezrodriguesVA1@cardiff.ac.uk

One Day Workshop fees for attendees £150 inclusive VAT

To register your interest to the event, please email: HellardL@cardiff.ac.uk

If you are interested in presenting your ideas at the event or joining the event, please contact Dr. Maneesh Kumar, kumarm8@cardiff.ac.uk
