3rd iLEGO Workshop

Tuesday 15th January 2019

Circularity in Industry:

How can waste valorisation add value to organisations and supply chains?

Organised by:

Prof. Maneesh Kumar & Dr. Vasco Sanchez Rodrigues

Inquiries, please email Nadine Leder (PhD Scholar) : LederN@cardiff.ac.uk

Registration: <https://www.eventsforce.net/cbs/421/home>

Venue: Executive Education Suite, 3rd Floor,
PG Teaching Centre, Cardiff Business School
Colum Drive, Cardiff, CF10 3EU

3rd iLEGO Workshop

Tuesday 15th January 2019

Circularity in Industry:

How can waste valorisation add value to organisations and supply chains?

The Challenge

How can organisations innovate their supply chains to transition towards a circular economy?

The Idea

- Can innovative waste valorisation models facilitate organisations to make their supply chains more circular?
- How waste valorisation is managed across different industries?
- What are the economic, environmental and social impacts of waste valorisation across different industries?
- How technological innovation facilitates supply chain to achieve circularity?
- What can organisations learn from best circularity practices applied within their industry and in other sectors?

The movement towards a circular economy has generated the need for more circular and sustainable business models; and as a consequence, organisations need to adapt and evolve their supply chain practices in core areas such as raw materials sourcing, production and logistics. This challenge become even greater with the recent increase in market share of online retailers, since customers need become a key stakeholder of the circular supply chains.

This workshop brings together practitioners from various industries and academia to share, learn and benefit from presentations from experts and fruitful discussions on circular supply chain models and best practices.
